

GUIDE RECOMMENDED FLY FISHING TIPS FROM THE PROS

Materials needed to make a sink tip leader:

- RIO Products In Touch Level "T" LINK to AMAZON -> [RIO Products In Touch Level "T"](#)
 - I like the T-14 with a sink rate of 8-9 ips

Spool of Maxima 25 lbs Leader Link to Amazon -> [Maxima Fishing Line One Shot Spools, Ultragreen](#)

- Nail Knot Tool
- Line Clippers
- Optional Zap-A-Gap Cyanoacrylate Glue (Crazy Glue)

Steps to make a sinking tip for your fly line

1. Cut a section of sinking leader material to length. I like to have a variety of lengths premade to customize how deep my fly will go.
2. With an 18 inch section of heavy mono tie a looped nail knot (this is the smallest knot I've found for tying on a loop) onto each end of the leader. This knot pretty small and passes easily through fly rod guides.
3. As added insurance apply either a UV cure or isocyanate glue to smooth the connection and increase the knot strength.
